Read the text and write the information about your job.

Daniel Goldman

      My name's Daniel Goldman and I'm the managing director of Xcel Systems. I'm responsible for the day-to-day running of the business including managing projects, organizing people's work, dealing with suppliers and important customers. I'm also in charge of developing the company's long-term strategy. What I like most about my work is the responsibility, the challenge and of course the salary. I also really enjoy motivating and inspiring other people to achieve their goals and develop the company. The part I don't really like is the long hours. It's not uncommon for me to spend 12 hours in the office, which doesn't leave me much time for my family. On top of that, my job can get pretty stressful at times, especially when we have problems with our suppliers.
